

Press release FJORD

Launch of the new FJORD 41 XL

Greifswald, 10.09.2020: With the new FJORD 41 XL, powerboat brand FJORD presents a yacht of superlatives and a completely new layout concept. The customer becomes the chief designer of their own yacht thanks to a unique modular configuration on deck and a variable interior design. A new hull was developed to implement this ground-breaking concept, featuring the world's largest T-top. In addition to outstanding sun protection, this creates the space for a top-class interior and deck design.

Product Manager Andrea Zambonini: “We have developed a completely new boat based on FJORD’s original DNA. Thanks to the new hull with higher freeboard, we have created significantly more volume in the interior to maximise comfort and the sense of space. The large hull windows provide plenty of light and complement the iconic design, which is crowned by the mighty T-top. Sturdy roof pillars are integrated into the bulwarks to complete the design-optimised interaction of hull, superstructure and helm station. In addition to maximum stability, this also guarantees the greatest possible ease of movement on deck.”

With a total of 90 possible combinations on deck, the FJORD 41 XL can be adapted to the customer's individual wishes. Whether a minimalist, tidy deck, a lounging area with designer furniture, a huge sunbathing space or a fully equipped galley – everything is possible and can be freely combined. Up to four driving seats, free-standing armchairs and chaise longues, which also can be used in the water, plus a large sunbathing area on the foredeck round off this made-to-measure lifestyle at sea. A further visual highlight is the ergonomic glass-bridge helm station, which is equipped with state-of-the-art technology for a sharp look and maximum usability.

For the first time, extensive layout adjustments are also possible below deck: choose a bright guest cabin with windows instead of a walk-in storage area, a galley and a second head. The master cabin can be enhanced with a dressing or working area, and closed off with a soundproof sliding door. This door can be recessed into the bulkhead to save space and allows the master cabin to be fully darkened when desired. The interior is available in five different design styles, each with a harmoniously coordinated mix of colours and materials. Of course, the customer can also create his or her own personal ambience with other exclusive fabrics, woods and colours.

The newly developed 3D configurator on the FJORD website allows you to explore and customise all options on deck.

FJORD 41 XL Highlights

- **The world's largest T-top**, which can shade an area up to 3.90m wide and 5.81m long with the integrated bimini
- **Largest hull windows** in its class
- **Largest single-piece windscreen** in its class
- **Newly developed modular deck configuration**
- **Various layout options below deck**
- **Various interior design styles**, each with coordinated colour and material mix
- **Standing headroom (well above 6'3 ft) throughout the living area** from the companionway to the double berth in the master cabin
- **Soundproof sliding door to the master cabin**, which can be completely darkened
- **Gyro stabilizer**, either 220V (generator) or 12V (battery powered)

The new FJORD was designed in collaboration with top yacht designers **Patrick Banfield** (exterior) and **Darnet Design** (interior).

The FJORD 41 XL will celebrate its **world premiere** at Boats2020 in Southampton 11-20 September.
