---

Fjord Boats will present the new Fjord 40 Open at the 47th Salone Nautico Internazionale in Genoa from October 6 – 14, 2007. All visitors will have the opportunity to get a closer look at her clean lines and her revolutionary propulsion system at Med One Sales S.r.l.'s stand (number 351).

The Fjord 40 Open's minimalist, modern and attractive exterior make her stand out in any crowd of motor yachts. She is the first model in a completely new line of Fjord motor boats. Designers and naval architects surrounding famed designer Patrick Banfield concentrated on the essentials: A fast hull shape, an extremely generous deck layout, and a comfort level that is exceptional for this class of boats.

The results have won over many customers already. The IPS drive system with its twin Volvo Diesel engines will accelerate the boat up to 44 knots. The joystick makes manoeuvring the yacht easy as a child's play, especially when docking.

The walk-around teak deck gives the yacht a sophisticated flair. Teak is standard on side decks, the foredeck, the stern, and the swimming platform. The high gunwale open up the deck and make it safer as you move about the boat.

You can relax on more than 10 square meters of sun beds. In a few simple motions, the sun beds will convert into a combination eating/sitting area for as many as 12 people. This much sundeck is unique among yachts of this size. The hard bimini provides shade on sunny days. In bad weather, the cushions can be stowed comfortably in the yacht's generous storage area.

Below decks the Fjord is noteworthy for its stylish design and innovative details. The interior shares the straight and clean lines of the exterior. The light interior of the Open 40 consists entirely of varnished wood. An unusual feature for an open motor yacht, the Open 40 features a complete owners' cabin with a double bed, flat screen TV, spacious closets and an ultramodern head/shower combination. Even tall owners will be comfortable with the headroom of over two meters. On a Fjord, expect to be pleasantly surprised.

Visit the Fjord stand in Genoa—the Fjord team is looking forward to seeing you.

Specification Fjord 40 Open:

Length:	11.99 m
Beam:	3.99 m
Displacement:	ca. 7.60 t
Engines:	2 x 310 - 435 HP
Speed:	ca. 36 - 44 knots
