

Hanse 320

The new Judel & Vrolijk designed Hanse 320 has been created with performance at the top of the designer's list of priorities and we are assured it will exhibit above average sailing characteristics for its size and class. With a large sail area, sleek underwater lines and custom T-speed keels, this new model has undoubtedly been developed with regattas in mind.

It has plenty of uncluttered deck space, a roomy cockpit for easy crew access, a fully battened mainsail, single line reefing, self-stowing maindrop system and self-tacking headsail – all intended to facilitate sail handling.

Her interior is also very spacious for a 32ft yacht and flush-mounted portlights provide plenty of light without spoiling the clean styling. Bright surfaces and cherry wood joinery emphasise the open and airy atmosphere below.
