PRESSEMITTEILUNG / PRESS RELEASE

HanseYachts US in Newport with largest display to date!

All courses have been set! Sailors in the northeastern US will be congregating in Newport from the 11th to the 14th of September for the 38th Newport International Boat Show. Manufacturers from around the globe will be showing off their boats and yachts in the Newport Yachting Center on foot bridges as far as the eye can see. And of course HanseYachts will be there with the largest display to date since the company's US branch was founded.

For the first time American sailors will have the chance to see and experience the completely overhauled **Hanse 400**. Owners now have the option of a single wheel, a twin wheel steering system, more room on deck, an open stern, side windows that can be opened and more interior options. Moreover, the **Hanse 400** has improved sailing performance thanks to the novel T-keel, which allows the "big-mini" to run at a good clip and reach top beam reach speeds. In total, 80% of the ship is new and on top of that there is a new equipment package.

The "Schüddelfrost", a concept yacht for the **Hanse 370** line, has already been sailing in the front of the pack at international regattas, and in doing so showed off her enormous speed potential. In addition, she has had her deck layout and other designer features overhauled thus bringing her up to the standards of the other models in the luxury class.

Numerous improvements await the visitors on board the **Hanse 470e**. And The **Hanse 540e** has profited in particular from the experience of the chief designer of team Alinghi, Rolf Vrolijk, whose victorious team made an international name for itself at the America's Cup. A deep-lying center of gravity with optimal weight and keel design are the secrets of this "turbo", which can also be sailed safely by smaller teams.

In addition, HanseYachts US will also be showcasing the brand new **Fjord 40 Open**, Europe's motorboat of the year. With its minimalist but modern exterior, unique comfort and last, but not least, its one of a kind propulsion system, the **Fjord 40 Open** is always the center of attention.

The "e" in the name stands for innovation, which includes the materials used as well. The hulls on these yachts are made from epoxy and by using such materials, long-lasting sailing pleasure and high value retention are both guaranteed!

If we have managed to pique your interest, be sure you make it to Newport. The Boat Show opens daily at 10 a.m.
