

## **Press Release 2007/ 41 - Hanse 350 and Hanse 400**

### **The Hanse 400 and Hanse 350 with new interior design variants**

Greifswald, 11/07/2007 – The designers of HanseYachts have developed new interior design variants for the Hanse 400 and Hanse 350.

So there is now a new owner version of the **Hanse 350**. Thanks to the many wood applications the interior seems even warmer. Because Hanse moved the head aft, not only are the seats in the Saloon more comfortable, but the Saloon is also much more spacious than originally designed. – “That is saying Something”. The objective of the designers, to provide more space for the prop even below deck, went hand in hand from the very beginning with a brand new design concept in the interior of the new yacht.

Since the first pre-series ships were presented to the public suggestions for improvements were already being made by dealers, boat show visitors and new HanseYachts customers. As in the past many of these suggestions were also incorporated in the current series production.

And this also applies to the **Hanse 400**. For this yacht the HanseYachts designers concentrated their efforts in producing a new standard forward cabin layout. Europe’s Yacht of the Year 2006 now has, as standard, an additional table and seat to fit it in the forward cabin, as well as new drawers.

Obviously other variations may be chosen thanks to HanseYachts’ own “individual cabin concept”.

HanseYachts always takes its customers’ requirements seriously and endeavours to convert them to reality. Ideas are developed not only for, but also with, Hanse sailors. With us yachts are not developed on the drawing board but on the water!
