

## HANSE 545

**T**HE Hanse 545 is the perfect summation of the statement made in our recent ads. "Why blend in when you can be your unique self, comfortably, aboard a Hanse?"

Designed by the Judel/Vrolijk naval studio the Hanse 545 boasts a tall keel stepped mast, uncluttered deck, full batten mainsail and Hanse's unique self tacking jib. Add to those sailing features an unmistakable exterior design and the interior layout choices we call the "Individual cabin concept" and you have a comfortable, easy and safe sailing vessel ready to take you anywhere you wish to go, in style.

As on all the Hanse's this new deck design leads all the lines to the helms, keeping the seating area clutter free while giving the captain full control of the sails from either of the dual wheels.

As one of the most social areas on any yacht, the Main Salon and galley have been carefully designed to meet the highest standards of comfort and practicality for the owners and guests. Both will find huge amounts of storage space in all the cabin and salon configurations, including our new full width aft master.

Contact your local Hanse dealer today to learn more about the New Hanse 545 and all she has to offer her unique owners.

### SPECIFICATIONS
