

HanseYachts first exhibition in Montenegro

Greifswald/Budva, March 4th, 2008. As a first, HanseYachts will participate in a Boat Show in Montenegro. For the 26th time now, the Nautic Show Budva opens its doors to the public. And our trading partner Avel Yachting will be presenting the **Hanse 540e** in the old Adriatic megacity.

This boat profits eminently from the experience of Rolf Vrolijk, who has made himself a worldwide name as chief designer of the victorious team Alinghi in the America's Cup. A low centre of gravity, along with an optimal total weight and keel profile is the secret of this „Turbo“, which can be sailed safely even with a small crew thanks to many innovative detail solutions.

And as the hull of this yacht is made of epoxy, the much-feared osmosis is also a thing of the past. Thus, long sailing pleasure and high value preservation is guaranteed!

The boats fair on the grounds of the „Adriatic Fair“ and in the Marina in Budva is open to visitors daily from April 30th to May 5th.
