## New Hanse 360 – Space Miracle in 39-Foot Class

**Greifswald:** The new Hanse 360, the fourth model in the successful new range from the collaboration with the yacht designers at Berret-Racoupeau, will be launched in the middle of the year. Its cutting-edge design not only ensures outstanding sailing characteristics, but also an enormous volume of space and thus an unusually high level of comfort in this class.

The typical Hanse chines give the Hanse 360 her striking appearance and also contribute to her stability and performance. An optional bowsprit extends the sail options and provides the yacht with additional performance on the water. Like all Hanse yachts, the Hanse 360 stands for fast cruising and easy sailing. All lines are led to the helm station, so that the yacht is not only safe and comfortable, but also fully suitable for single-handed sailing, as is usual with Hanse.

To ensure sustainability even without wind, just like the recently presented Hanse 410, the Hanse 360 will also be available with an electric drive with a long range that is unique in her class.

The new Hanse 360 will be officially launched in summer 2024, before celebrating its world premiere at the Cannes Yachting Festival in September.
