

Moody 41AC

THE MOODY 41AC marks the beginning of a new era for recent owners Hanse. With its distinctive construction and features, such as a vertical stern and oval windows, designer Bill Dixon and interior designer Mark Tucker take the values of the past and transfer them into a contemporary yacht. Combined with individual options, such as two single berths or the cus-

tomisation potential, the Moody 41AC becomes a special yacht in its category. It continues to use cutting-edge production technologies and modern materials as well as the trademark self-tacking jib. Built by Europe's leading boat builder – Hanse Yachts in Germany, this new model will complement the already successful Moody 45.

Specifications
