

PRESSEMITTEILUNG / PRESS RELEASE

Capacity Increases Completed

Two years ago HanseYachts AG began extensive expansion investments, which were recently completed when production commenced in the new production facility at company headquarters in Greifswald, Germany.

In addition to acquiring Moody Boats and the remaining 49 % of shares of the Norwegian company FjordBoats AS, HanseYachts AG also invested roughly 31 million euros over the past 24 months in the expansion of its production capacity at company headquarters in Greifswald and at its subsidiary company TTS in Goleniow, Poland. In total, more than 20,000 square meters of production facility space was constructed for producing glass reinforced plastics (GRP) and for final assembly of larger series yachts. Moreover, the control system software and machinery are now state of the art as well. Efficiency and the automation of the production process have been increased by collaborating with the consulting firm of a large German auto manufacturer. An additional production line enables quicker incorporation of new developments in series-line assembly.
