BLUEWATER COMFORT

Bluewater 50

These luxury cats, built by the Discovery Group in Southampton, use the same hulls as the original Bill Dixon designed Discovery 50 cat but with a new deck mould.

The first to launch has been built for Discovery's founders John and Caroline Charnley. Similar to Discovery's monohulls, this could make a good choice for those who want a boat to look after them and who put to comfort above outright speed.

Price ex VAT: £1,095,000 www.bluewatercats.com

Privilege

Hanse had a notable hole in its product range in comparison to the other two largest manufacturers (Groupe Beneteau and Bavaria). A surprise for some may have been that the German yard chose to buy high-end, small series French brand Privilege. Over 600 Privilege cats have launched over three decades and they have a good reputation. It will be interesting to see how Hanse modernises the brand.
